

To Whom it May Concern,

Our user is carrying a portable electronic device. **The device is the CUE1, a medical device that aims to reduce slowness, stiffness, rigidity and freezing of movement in Parkinson's disease.** The CUE1 utilises pulsed cueing and focused vibrotactile stimulation to alleviate symptoms.

The CUE1 has passed the EN 60601-1-2:2014 (Electromagnetic Compatibility test) and the IEC 60601-1:2005 (Medical Device Safety test).

Please allow our user to pass through airport security and customs and board his or her flight/s with the device.

If you have any questions about the CUE1, please contact us at our office or info@charconeurotech.com.

Yours sincerely,

Charco Neurotech

To our dear users,

Please remove the CUE1 before passing through any x-ray or other airport security scanner to avoid potential alerts / damage.

We wish you a safe and pleasant journey.
